MEMORANDUM FUR: Deputy Director (Intelligence)

25X1 SUBJECT:

> In response to your request I have reviewed the terms of reference for the offices under DD/I. The recommondations below are submitted with the concurrence of the AD concerned:

- 1. That TAB A be substituted for the present terms of reference of DD/I.
- 2. That TAB B be substituted for the present terms of reference for CCD.
- That TAB C be substituted for the GRR terms of reference. The only charge here is the deletion of "under the approved agency intelligence program" since its meaning is not clear and what needs to be said is taken care of in II.A.
- 4. No change is recommended in the present draft for ONE. There are two points, however:
 - a. Whereas I can envisage other ways of saying what is in Functions II.A. and B., which might be more explicit in terms of your notions about programming. I would be inclined to recommend no change at this time.
 - b. The reference to the Board of Metions Estimates is a bit anomalous since at no other point in the Board mentioned. If it is a part of the office of National Estimates it isn't necessary to speak of the AD/NE as sitting as chairman. If it is scrething outside of the Office of National Estimates it presumably ought to have a status explicitly recognized. To clarify this point might involve a major reorganization affecting CME and I doubt that this is the place to go into that.
- That TAB D be substituted for the terms of reference for AD/IC. You will note that the only change is in the statement of Mission and that there I have removed the reference to the DCI. I realize that it might be more appropriate to insert the DD/I, except that in some cases I find myself assisting DD/P or one of his offices and frequently I work with other AD's or their people on matters which do not need to be raised to the level of the DD/I.

- 6. That the attached TAB E be substituted for the present terms of reference of OCI.
- 7. That the attached TAB F be substituted for the present terms of reference for GSI. Because of the current discussions on the scientific and technical intelligence problem I recommend that you look this over carefully. By and large the revision is mainly rearrangement and compression, plus the berrowing of the first of the functions from that used by GRR, namely, "to formulate and recommend the intelligence research program for his effice."
- 8. That the TAB G be substituted for the present terms of reference of OO. I also recommend that paragraph II.I. be deleted or at the minimum the word "analyze" be removed, but Guerge Carey insists it should remain as is because these things are in fact done by OO. My view stems from the fact that the word "analysis" is generally construed to indicate a function properly performed in production offices and that "selection" and "editing" and the kind of "analysis" actually performed in OO are normal processes for any collector and do not therefore require special mention.

25X1

I call your attention to paragraph II.H. which deals with and the current problem that exists in this respect between OC and CRR. Bob Amory protests the inclusion of the last clause of this paragraph on the ground that to forecloses the issue which is currently under discussion. I recommend that in view of this disagreement you inform George Carey that approval of this item at this time does not close the question.

JAMES Q. REBER
Assistant Director
Intelligence Coordination
